I am a truck driver and the weather and traffic information is vital to my job and well being. I use the weather information to keep me out of harms way when storms or bad weather are in the area that I am traveling in or taveling to. The traffic information helps law enforcement because I (as well as many others)try to divert my load(travel) around the problem area therefore reducing the risk for more traffic problems and back ups. Please thoughtfully consider this as I pay for this service. It is not free like the FM/AM stations are. And, I know I speak for other truck drivers who do not have access to let you know this.
